Dr. Aleck Bernstein  
Central Enteric Reference Laboratory  
Colindale Avenue  
London, N. W. 9, England

Dear Aleck:

To yours of the 27th: Thank you for bringing me up to date on your situation. The Kansas opening does not sound very promising to me.

Actually there has been and is going to be a rather considerable turnover and I have sent your name in for a couple of possibilities already. If anything comes of these, you will doubtless hear directly.

From the records here I was able to construct the substance of the curriculum vitae of which a copy is enclosed. If this should be altered or amplified in any way, please let me know.

With all best regards,

Yours sincerely,

Joshua Lederberg  
Professor of Medical Genetics
